3) Letter from the Dy Comr: Kadur Dt. dt 20th Feb. 1893, No 436.

On the 5th November 1891, Syed Ameer Alli petitioned Government to purchase from him at least 2 dozen or more of his "Hosamee Coffee Peelers" which had been approved of by the Coffee Planters at the Dussera Assembly, and to send them to the Coffee growing Talukks as an advertisement. He further solicited that half the value of these Machines (Rs 250/= each, including the cost of sieves to size the Coffee) be granted to him as an advance, the balance being payable on delivery of the Peelers.

2. On the 16th November 1891, he was informed by an Endorsement that Govt would be glad to purchase 6 of his "Hosamee Coffee Peelers" with sieves for sizing coffee at Rs 250/= each, and that their full value Rs 1500/= would be advanced to him to enable him to have them, and more on his own account, made; and the

of the agreed, he might present a bill for that sum for counter-signature and payment at the Mysore Dt. Treasury or Bangr. Harper Treasury – and fixing the time for delivery of the machines before the end of December (proximo)

3. On the 17th November 1891, Mr. Syed Ameer Ali presented a bill for Rs. 250/= and verbally requested that the amount might be ordered to be disbursed from the Mysore Dt. Treasury as he urgently required it for getting up further Copies of the Machine – The receipt presented was accordingly countersigned for payment at the Mysore Dt. Treasury

This payment was for a Machine which Mr Ameer Ali says was exhibited by him at Mysore and subsequently sent by him to Mr L Rickett. & has forwarded to Madras

42. In accordance with the orders conveyed in Govt. Pro. No. 597-600 F.Z. 2-95 dy 16th July 1895, the Chief Engineer has forwarded a report on the Coffee Peelers by Mr. V. Rangavaniengar, Asst. Engineer. After remarking that the small quantity of cherry coffee brought by Mr. Ameer Ali was not sufficient to make a satisfactory trial, Mr Rangavaniengar gives a description of the machine and deals with every part of it in detail. His remarks on them run as follows:-

"1. Frame - Workmanship and materials are not bad but owing

※ In reply to this the Dy Comr of Hassan submits letter dy 19th January 1895 from Mr Syed Ameer Ali in which the latter states that the machines having been badly made by Messrs Richie & Co they always get into disorder, that although there is a great demand for the machines it is not possible to sell them without repairing them and putting them into proper working order & that arrangements have been made with a firm in Europe to get new discs made so as to fit the machines and requests extension of time for the payment of the amount due to Govt.

The Comptroller also requests to be informed what orders, if any, have been passed regarding the repayment of the balance due from Mr Ameer Ali

Pending before Govt for orders

owing to the design it is not as
rigid as it should be. Mr Syed
Ameer Ali tells me that, when
the machines are set up, considerable
difficulty is met with in making
them run true. He also complains
that the nuts used are not to
the standard gauge The latter
error can be rectified by the
firm by taking up the faulty
nuts wherever they have used
them. As for the former the
makers are not responsible.
However, it is not a serious
defect and the machine will
run all night if set up on
a level ground.

2 Fly wheel, Horizontal Spindle and
bearings – The Fly wheels are
heavy and substantial but
the handles are very rough
and not fixed properly. The
thickness at the point where
they are fixed to the wheels
are not sufficient.

Horizontal Axle. – The steps for
the

the bearing might have been made deeper. The brass bearings have been simply bored and put on. The makers ought to have filed and fitted them properly. No doubt after a few days' working this defect will disappear. It will not cost much to ease the bearings and give them a good fit. The makers can do this even now.

3. Bevil gearing — In the machine which was put up for trial I M[r] had nothing to find fault with. But in some the keys have not been fitted and the wheels not in position. Messrs Rickie & Co say that they were all fitted once and that subsequently the keys have been lost. It is quite probable as I find the key ways have been cut.

4. Vertical Spindle — I find that this has been carried out according to the tracing shown to me by the patentee.

Herde

There is one defect in the top bearing which will soon interfere with the proper action of the machine. There is no means of adjusting it when it becomes slack owing to working. This is not a defect in the workmanship but of the design. The locking nut and hand wheel are alright.

5. The dises — I was shown two forms of dises, one made wholly of cast iron and the other of cast iron ~~top~~ bottom with chilled plates on the top. It is on the design of these dises that the patent is based and the success or failure of the machine depends upon these. The first dise (i.e.) wholly of cast iron has been made according to the designs furnished by the patentee. It seems that this got worn out soon and therefore the patentee proposed to have chilled plates screwed on the

the top. So far as these plates could be handled without going to considerable expence in the way of grinding them, I think Messrs Rickie & Co have done their best. But I cannot understand how they advised the patentee and much less undertook to make them. No doubt they did not anticipate the difficulties. Considering the price the workmanship is satisfactory. In one point they have failed to carry out the design of the patentee (i.e.) in that they have omitted the "peeling channel" altogether. Messrs Rickie & Co say that they could not be made of chilled iron and so omitted it. But I don't think they are right there. I do doubt it could be made but probably they found it.

it from their into some expanse.
The patentee asserts that this
omission is the sole cause
why so many berries escape
unpacked. There is some truth
in this but I am not quite
sure whether the action would
be perfect even if the channels
had been ~~were~~ made. The patentee ~~asserts~~
asserts that the grooves are
not sharp and deep. I don't
think that they can be got
better in cast iron. Of course
if they had been shaped in
a machine they would have
been better. But chilled iron
will not admit of this and
therefore the patentee ~~had~~
has nothing to complain of.
The patentees next contention
is that the surface is not
true. With chilled plates
and so many in number
it is not possible to make
the surface quite true.

As

as I have remarked before, the makers could not have done this without going into considerable expense. Chilled cast iron cannot be filed or clipped and therefore no fitting can be done.

Besides in my opinion it is not necessary that the discs should run so true. I examined some of the machines and they were true enough. Coffee seeds are of various sizes and if the interval between the discs be adjusted to some size it is bound to break up all others which are above this size and this will happen even if the discs run true.

In conclusion I am of opinion that: —

1 The materials are good.

2. The workmanship is fair with the exception of the

points

points already mentioned in my report above.

3. Messrs Ricket & Co have not made the discs exactly as per design viz. omitting the feeling channels.

4. The discs have been fitted fairly well. There is room for improvement but to do so the parts will have to be ground which will be very expensive indeed.

5. The design is defective. No doubt it will feed the seeds but there will always be some crushed and some not feeded at all owing to the space between the discs not being capable of auto-matic adjustment. In fact if the upper disc had been mounted quite loose and weighted or pressed by means of a spiral spring, the

the machine would work
better. x x x x "

"I am therefore of opinion
that the fault lies not in
the workmanship but in
the design."

11. On the 15th Aug: 94 Messrs Rickie & Co. having sent up a bill for the balance of Rs. 600 due to them towards the cost of making new sets of discs according to the agreement, Mr. Syed Amir Ali was asked to state whether he had any objection to the payment of the amount & whether the new sets of discs had been made & supplied according to the Stipulations entered upon by Messrs Rickie & Co., and what progress he had made as regards the adjust-ment of the advances made to him.

12. In his reply Dt 8.9.94. Mr. Syed Amir Ali stated that as Messrs Rickie & Co., did not make the discs in time, they were not entitled to any further payment. that he did not know if they had completed all the discs according to the agree-ment, that the workman-ship of the few discs which

they gave him was not good,
that he informed them of
the fact, & that they were
also informed that as the
machines were bad, they
should make new ones under
the terms of the agreement,
or return the amount ad-
-vanced by Govt, otherwise
they would be liable for
damages.

13 Thereupon { Messrs Ricketts & Co., were asked to furnish information on the following points:

(1) How many coffee Peelers were delivered to Mr Syed Amin Ali, & how many were awaiting removal upto that date.

(2) why the new sets of discs were not made within the stipulated time, which expired on the 26th October 1893.

(3) whether the discs had been made as agreed upon?

They were told that the remaining machines should not be allowed to be removed by any body without the express order of Govt

{ Mr. Syed Amin Ali was asked to settle the account at an early date, and

No. 20333 dt 11.5.95.

14. In reply Messrs Ritchie & Co, Stated as follows

"20 Coffee Peelers were deli
(1) -vered to Mr. Syed Amir Ali
34 were awaiting removal

(2) "One Coffee Peeler with
"new Set of discs was approved
and taken by Mr. Amir Ali
on the 23-10-93, & the Stipula-
-ted time was 26-10-93. The
"Short Space of 3 days betwee
"the approved time & the Stipu-
"-lated time was quite in-
"-adequate for completion.
"Hence, the delay was due
"to the time used for alter-
"-ations on the patterns for
"new Sets of discs by Mr.
"Syed Amir Ali. (vide para
"2 of the agreement, which
"says that for the first Set
"the Chill plates with angle

"Shall order)".

(3) "The discs have been made
as agreed upon, in fact we
have done more than we
agreed to do".

15. Thus, there being a con-
-tention between Mr.
Syed Amir Ali and Messrs
Rickie & Co., as to the making
of the peelers & dises, it was
Considered advisable to ascertain
by proper examination
of the machines whether the fault lay in
the materials used as well as
their workmanship or
in the design, and accordingly
the machines with dises in the hands of messrs Rickie & Co,
were ordered to be taken
possession of by the Ex: Engr
Bangalore Dn., and care-
-fully examined by Mr
Rungaswamiengar, Asstt
Engr., who was required
to submit a report for the
decision of the point at issue.
(vide Govt Pro: No 597-600 & 16.7.95)
H.7.2.95
In the Same Progs. the balance
of Rs. 600 claimed by messrs Rickie & Co.
was ordered to be paid to them

16. On the 9th September 1895,
the Chief Engr forwarded
the report of Mr. Rungaswa-
-miengar who stated that

with certain exceptions, the workmanship was fair, and that on the whole the fault lay not in the workmanship but in the design.

17. Thus, it will be seen that the total amount advanced to Mr. Syed Ameer Ali was 7875/- out of which he paid Rs. 2000/-, leaving a balance of Rs. 5875-. In addition to this, an expenditure of Rs 20/6/- was incurred in removing the machines from the premises of Messrs Rickie & co to the office of the Ex: Engr. Bangalore Division. Mr. Syed Ameer Ali has not yet paid the balance. viz Rs. 5875+20-6-0.

Mr. Amir Ali has ~~again~~ submitted a petition today in which he reports that he was served with a notice from the Dy Commissioner, Hassan, asking him to attend the Taluk Cutcherry, Hassan, to fit up the machines handed over by him. Mr Amir Ali says that he cannot fit the machines up as he is not a fitter and it was usual for Messrs Rickie & Co to send a fitter from their firm for fitting up the machines every time he sold them. He further adds that it is impossible even for a fitter to do the work in the Taluk Cutcherry with the requisite implements

We cannot fairly call upon the defaulter to do any such work as belonging to the Taluk Kacheri & fitting up the machines. If he had chosen to do so perhaps the price realised wd have been higher.
The petn may be sent to the Dy. Cr who shd do what is likely to be most beneficial

under the circumstances.

I think all the sales must be confirmed. I see no reason why after receipt of notice they, we should set aside the Bangalore sale merely because another person offers some 120 Rs more. A draft order accepting the above view is submitted for approval.

The Dy Commissioner, Bangalore, reports that though 34 pieces were advertized for sale in the Gazette, only 33 pieces were auctioned and knocked down to one Hyderkhan for Rs 340/ as one machine had been taken away by the Ex. Engineer, Nessarghatta Water Supply Divn, long before the receipt of final orders of Govt in the matter, that as in the sale patti it was clearly stated that the machines in the sale premises were to be sold, the purchaser can have no claim on the one removed from the premises long before the sale. The Dy Commissioner solicits orders to credit the cost of the one machine in question to the balance due by Mr Syed Amir ali, In a subsequent reference he states that the Executive Engineer Bangalore Divn has remitted Rs 10/6/- the value of the machine which is kept in deposit pending orders of Govt.

to.. / He may be requested to dispose of it at another opportunity & report

The Dy. Commissioner Bangalore - submits a petition from Ryder Khan, who purchased the Peder -

The petr. says that 34 Peders were advertised for sale - that he was placed in possession only 33 - that the Asst. Commr. who conducted the sale promised him that the remaining one would be placed in his possession soon - that he made repeated representation in the matter - that Commr. Bangalore allowed all who attended the sale, referred him to Dy. Commr. and Executive Engineer informed him that the Peder was not available and that its proportionate value will be remitted to the Dy. Commr. Bangalore.

The above Endorsements are dated respectively 27-3-03 and 11-4-03.

The Dy. Commr. in his letter No. 1015 of 18-3-03 solicits orders to credit the cost of the Peder, under dispute, to the balance due by Mr. Syed Ameer Ali, adds in the concluding portion that as the purchaser has not up to date of his letter demanded the 34th Peder he seems to have acquiesced in getting possession of the machines as per sale list (viz. 33)

It will be seen from the dates of the Endorsements referred to by the petitioner that he was carrying on correspondence with the Asst. Commr., who held the sale, and the Executive Engineer for the delivery of the Peder. He approached the Dy. Commr. with his claim only after he was told to do so by the Assistant Commr.

Under the circumstances may the Dy. Commr. be asked to keep the Value of the Peder under dispute to the Petr.

The cost of one of the 34 packets belonging to Mr. Syed Ameer Ali, which had been advertised for sale but respecting which claim had been transferred by the Ex. Engineer Bangalore Division to the Belagola water Works previous to sale and for which Rs. 10/6/- were received, was claimed by one Hyderkhan to whom the remaining 33 was knocked down in the sale held by Mr. Ahmed Ali, Asst. On this the Dy. Comr. was ~~asked~~ informed that it was alleged by Hyder Khan the remaining packet was also ~~asked~~ promised to him by the Asst. Comr. its Value might be paid to ~~him~~ him and that

if otherwise it might be credited to Govt.

The Dy. Conr. States in reply that Mr. Ahmed Ally is of opinion that the purchaser, Hyder Khan is entitled to get 34 Feders and not 33 & that the records connected with the case also show that the purchaser was entitled to get 34 Feders and that under the circumstances he proposes to remit to Hyder Khan Rs. 10/6/- the value of one Feder sent to Belapola water works.

Memo of opinions expressed on the working of the Coffee Pulpers.

Chikmagalur Taluk.

Coffee Planter Mr. Allardice. Vide his letter dated 14th April 1892.

"I write to say that I think the Coffee pulping machine you sent me for trial would work very well, if the dried berries were made into sizes before being passed through the Machine and I think the holes in the upper disc, should be made a little larger, so as to allow the berries to pass more freely than they do at present."

Coffee Planter Mr. Augonin's letter dated 26th April 1892.

"The Coffee pulping machine was tried by me for several days with various samples of Cherry Coffee. In my opinion the principle of the machine is correct and it is only necessary to build one on a stronger pattern, with a more perfect arrangement for feeding, and two heavy driving wheels on an iron frame to make it a

very useful and economical machine for Coffee pulping".

Koppa Amildar's Report No. 151.

As directed by the Deputy Commissioner the Pulper was sent to Mr. Brett. It was tried by him. Then it was sent to Mr. Colledge & to Amadi Kotate. The Coffee Planters are of opinion that the holes through which berry passes should be a little larger and the planks on the two sides fitted to receive berries are not fitly joined. The sieve is not large enough. There should be only one large hole to let down berries. All these improvements should be made.

Mr. Bourpalais' letter dated 30th March 1892. Tarikere Taluk.

"I gave the Pulper supplied by Mr. Ameer Ali my trial and found it not quite up to the mark and would suggest that it should be improved".

The Pulper was seen by almost all native and European Coffee Planters. Mudigere Taluk.

It worked better in the case of unparched Coffee than in that of Parchment Coffee.

The people are of opinion that the price of Rupees 240 is rather high.

HIS EXCELLENCY,
The Governor-General in Council.

MAY IT PLEASE YOUR EXCELLENCY.

THE application of Mr. Syed Ameer Alee, Coffee-Planter, inhabitant of Hassan in Province of Mysore, temporarily residing at Silladar lines Road, Bangaloro City, for leave to file a Specification under Part I of the Inventions and Designs Act, 1888. The applicant is in possession of an invention for a "Coffee-Peeler" to be called "the Hussani Coffee-Peeler."

He is the inventor thereof, and, to the best of his information and belief, the invention is new within the meaning of *Part I* of the Inventions and Designs Act, 1888, and no circumstances exists, which if the applicant is authorized to file a Specification and files it in accordance with that Part, will disentitle him to an exclusive privilege hereunder in respect of the invention.

The following is a description of the invention; the invention consists of two cast iron disks (A and B in plan) placed horizontally one over the other whose adjacent surfaces are indented in parallel lines which are symmetrically disposed. The top disk is made to revolve while the bottom remains stationary with an arrangement to move the top disk vertically by means of an adjusting screw (C) under the lower disk to secure the requisite clearance. Motion of the upper disk is imparted by means of bevelled wheels (G and H), one of which is fixed to the spindle (F) while the other is connected to a steel horizontal shaft (I) and fly wheel (K) which may be worked by hand or any other power.

The following advantages over existing Peelers or claimed (1) the certainty of Peeling Coffee without breaking or damaging the berries, as the space between the two disks is easily adjustable. (2) The preservation of true colour, and flavour of berries, as the Machine expels berries and husk immediately they are detached one from the other. (3) Great facility of adjusting the space between the disks which is done by simply giving a few turns to the single regulating screw at the bottom which operation could be performed by an ordinary cooly. (4) The simplicity of Mechanism which renders the Machine easily workable and repairable when necessary. (5) The capability of the Machine to be applied to peel other grains besides coffee. (6) The cheapness of the Machine which places it within the reach of all planters. (7) Facility of feeding the Machine through the feeding box (L) regularly and continuously to the requisite extent. (8) The great saving in the power required to work it. (9) Its portability and compactness to admit of its use in any place without special preparation to work it.

The applicant, therefore, applies for leave to file a Specification of the invention pursuant to *Part I* of the Inventions and Designs Act 1888.

The applicant hereby declares that the facts stated in the application are true to his knowledge except as to matter stated on information and belief and as to those matters he believes them to be true.

SPECIFICATION

For a Coffee Peeler invented by Mr. SYED AMEER ALEE, Coffee-Planter, Inhabitant of Hassan in the Province of Mysore, temporarily residing at Silladar Lines, Bangalore City, to be called "Husaini Coffee Peeler."

THE FOLLOWING IS A DESCRIPTION OF THE INVENTION:—

THE INVENTION consists of two cast-iron or steel-faced Disks. (upper Disk marked A. and lower Disk B. in plan), placed horizontally one over the other whose adjacent surfaces are indented in parallel lines which are symmetrically disposed. The top disk is made to revolve while the bottom remains stationary with an arrangement to move the top Disk vertically by means of an adjusting Screw (C) under the lower Disk to secure the requisite clearance. Motion of the upper Disk is imparted by means of Bevelled Wheels (G. and H.) one of which is fixed to the Spindle (F), so loose as to allow it to go up and come down easily by its own weight, while the other is connected to a steel Horizontal Shaft (I) and Fly Wheel (K) which may be worked either by hand or any other power.

The following advantages over existing Peelers are claimed:—

I. The certainty of peeling coffee without breaking or damaging the berries, as the space between the two Disks is easily adjustable.

II. The preservation of the true colour and flavour of the berries, as the machine expels berries and husk immediately they are detached one from the other.

III. Great facility of adjusting the space between the Disks, which is done in simply giving a few turns to the single regulating Screw at the bottom, which operation can be performed by an ordinary cooly.

IV. The simplicity of mechanism which renders the machine easily workable and repairable when necessary.

V. The capability of the machine to be applied to peel other grains besides coffee.

VI. The cheapness of the machine which places it within the reach of all planters.

VII. Facility of feeding the machine through the feeding box (L) regularly and continuously to the requisite extent.

VIII. The great saving in the power required to work it.

IX. Its portability and compactness admit of its use in any place without special preparation to work it.

The following explains the plan of the invention annexed:

A. Upper Disk.
B. Lower Disk.
C. Screw to adjust the space between the Disks.
D. Heel to support the Spindle.
E. Mouth or Cup to receive the supply from the Feeding-Box.
F. Spindle to which the upper Disk is attached.
G. and H. Bevel Wheels to set the Spindle in motion.
I. Horizontal Shaft.
J. Band Wheel.
K. Fly Wheel.
L. Feeding Box.
M. Frame Work.

To the Same and the Comptroller Nos 3355-58 Cy 279-72 11/9/92

Mysore Govt. C. Press, Bangalore.—30-6-92—3000.

This agreement made the seventh day of September in the year 1892 between Mr Syed Ameer Alee as the Patentee of "Hunsaleni Coffee Peelers" and the agent of the Mysore Government to get the Machine made and sold and Messrs Richie & Co as the Manufacturers of the said Peelers. Witnesseth that Messrs Richie & Co bind themselves to make for the said Mr Syed Ameer Alee for and on account of the Mysore Government as many of the said Peelers as he may require to the extent of (200) two hundred machines for the year of 1892-93 ending 28th February 1893 on the following terms

Messrs Richie & Co will make Peelers at Rs 165/- for the A Size at Rs 125/- for the B Size and at Rs 80/- for the C Size, the said prices include all the packing and other charges deliverable at the Bangalore City Station. The specifications of the parts and the size of the said Peelers are hereunto attached. These Peelers it is agreed shall be made completely in Iron of soft quality no shells to be used in the Casting

Mr Syed Ameer Alee as the Agent of the Mysore Govt will give orders from time to time in writing for the number

of Peelers that he may require and pay an advance for the same at (40%) forty per cent on the value of the order at the said rate, and Messrs Ritchie & Co. will by writing in reply on the same day bind themselves to make the Peelers at the outturn rate of thirty machines per Mensem and deliver at the Correct time as may be agreed upon for the execution of such order, and it is further agreed that the balance of the Cash value of every machine be paid at the herein agreed rate within three months after the date of the delivery of each or any number of machines.

The Peelers must be made true and strong and the workmanship must be good workmanship otherwise they must be broken up and new Peelers must be made instead, so as to be ready for delivery in the correct time undertaken. Mr Syed Ameer Alee as agent of the Mysore Govt. agrees to pass and approve all designs and patterns before the work is undertaken.

Every Peeler of every size must bear its serial numbers regularly and no number should be left vacant to be filled up in future

and

and every part of the Peelers must bear the number of the disks to which it belongs so that any part of one machine may not be fitted to any other machine.

Messrs Buchie & Co will give preference to the work of the Peelers over all and every other order that they may now and then get from other parties, will also make the remittances for Mr Syed Ameer Alee the agent of the Mysore Govt at the rate of Rs 4 5/2 each under the same condition as for the Hurrani Coffee Peelers; the specification of which will be submitted immediately after the first machine is completed on time for Durrani meetins

Messrs Buchie & Co gave power to Mr Syed Ameer Alee agent of the Mysore Govt to enter upon their premises from time to time during work hours as he may think proper to inspect the progress of the work; if the works delayed by any neglect on their part or on the part of their workmen, Mr Syed Ameer Alee agent of the Mysore

Govt or other officer which the
Resident Govt may appoint will
have power to take over charge
of the said work and the workmen
and machines which he may require
for completion of the same and
shall have full power to dispense
with the services of such workmen
and to appoint substitute or substitutes
Messrs Rickie & Co will not be held
responsible for delays owing to strikes
Conspiracies or through acts over which
they have no control but will do their
utmost to carry out this contract
in all good faith and on the other
hand Mr Syed Ameer Alee Agent
of the Imperial Govt undertakes to show

Honored Sir

The humble applicant respectfully begs to bring to your honor's notice that the cost of the manufacture of 54 Husainee Coffee Peeler sanctioned by the Government under the proceeding No. 3956-6 -G.F. 74-92 dated Bangalore 11/14 September 1892 is Rupees 6775 of which Rs 6210 are paid to Messrs Pickis & Co and the balance to be paid is Rupees 565 which they are demanding. The machines not having been made in time, the applicant could not sell more than 9 Peelers in the last season of the value of which Rs 2000 are paid to the Hazur treasury as part payment of the said advance this sum will reduce the amount of advance to Rs 4775 which will also be paid in early part of the next season

season

For the want of experience in the quality of the metal required and the correct method of manufacturing the discs of the Peelers they are made in Cast Iron entirely and the groves are created in casting only consequently when coffee is Peeled the groves wear out soon after which the machine will be of no use: therefore to make it useful one and to give satisfaction to the public a new set of discs faced with indented Chill Iron plates (which metal is harder than steel) with an arrangement to change them when necessary must be supplyed to the present frame: but in the agreement that the applicant got from Messrs Ricker & Co in the last season there having been no condition made to supply him without any additional charge such part of the machine which may be found having been manufactured with any defect (as in the present case) he is unable to or to demand press them to make new discs for him free of charges and therefore he submits to your honor that if the Government

Government be graciously pleased to grant as an advance the cost of making new discs which will be about one thousand Rupees or eleven hundred he will be able to make improved sets of the discs for the machine and to sell them with advantage in the early part of the next season and get the last years account cleared soon

This agreement is made on the day of twenty sixth August eighteen ninety three, between Jn. Syed Ameer Allee as the inventor of the Husainee Coffee Peeler and the Agent of the Mysore Government and Messrs Pickie & Co, as the Manufacturer. Witnesseth that Messrs Pickie & Co. herewith bind themselves to make nine sets of dies to fit the Cranes of the Husainee Coffee Peelers made by them Ordinary at the following rates viz. 10 Sets A Size at Rs 30/- per set of upper & lower discs 20 inches in diameter, one regulating nut, Ten shoots and Funnels. 40 Sets of B. Size at Rs 20/- per set of one upper and lower discs 16 inches in diameter with regulating nut, ten shoots & funnels. The face of the discs will be bolted with indented Chill plates and the Metal will be of best quality. For the first set the Chill plates with angled grave will be made for experiment and Jn. Syed Ameer Allee after trying shall order to make all Chill plates either of angled graves or round ended graves and plates will be made in such a manner that at any time any section of it may be changed without trouble, and the Fittings will be nicely arranged as for the faces of the discs to run true to each other during the working. The Funnels and the feeding shoots will be made so fine as not to block during the feeding. The damaged discs being useless they will be destroyed and the scraps used

diameter so as to give facility to turn
the wheel without wrench and an
arrangement will be made to check
the adjusting wheel at its position when
regulated by a spring under the loaden
dise as explained by Mr Syed Ameer Allee

These sets of dises will be made in
sixty days from this date. The metal
used for manufacture will be superior
quality and work in general will be nice
& true. Otherwise Mr Syed Ameer Allee as
the Agent of the Mysore Government has the
power to prosecute them and Messrs Richie
& Co will send hereafter to make new
ones soon for the Government free of
additional cost & otherwise to repay
the advances received. Messrs Richie

I beg to acknowledge the receipt of your Honors letter No. 12519 L. C. & 779-92 dated the 1st instant and the enclosures

In reply I respectfully beg to state that I will remit to the Deputy Commissioners the amount of references as soon as I hear from them

The understanding about the advances against the Hussanee Coffee Estate is that it must be repaid to the Government as soon as they be sold but Messrs Rickie & Co notwithstanding my pressing demands not having made the machines up to this time and a few that they made not being good I was unable to sell it. And now

the Coffee-season having been over both European and Native Coffee Planters who have been demanding the machine have cancelled their order for it as Head Messrs Rickie & Co made good Peelers under the agreement in time. I would have been able to sell them and close the accounts with the Government by this time.

I have the honor to acknowledge the receipt of your letter No. 38082 dated GJ 79-93
Bangalore 28th August 94 and in reply I humbly beg to bring to your honor's notice that Messrs Rickey & Co are not entitled for any payment. They did not make discs in time I do not know whether they made them by this time or not if they made them I do not know whether they have made nice according to the agreement or not. The firm says that they gave me a sample in January 94 are given to me but to my idea even the workmanship is good I have kindly requested to communicate this fact to them and requesting them to inform me nicely whether they have made discs

dise according to the agreement or not and also to place the machines for my inspection but they did not send any reply to my letter on this point. I then having been tired of waiting several months for a reply I have quickly written to them saying that a few dishes and machines that they gave me as sample are even bad and a few more machines that I once saw standing at there works were also bad therefore they under the terms of agreement have to make new machines and dise or else of they being unable to turn out good work to return at once to the Government the sum of advance that they received under the agreements otherwise they will be (liable) responsable for damages I think they have since got my letter presented their bill for Rupees 6000 to the Government to draw the amount quietly

I am now at Bangalore and intend to go to Bangalore about the end of this month and to wait

2 Machines were removed since May 1893

One Coffee Peeler No: B20 fitted with new set of Discs was approved and taken by Mr Ameer Alli on the 23rd October 1893, and the stipulated time was 26th October 1893 and not 26th October 1894 as per Your letter ~~Despatch~~. The short space of 3 days, between the approved time and the stipulated time was quite inadequate for Completion. Hence the delay was due to the time used for alterations on the patterns, for new set of Discs by Mr Ameer Alli

NO. 5163

Report on the coffee peelers manufactured by Messrs Rickie and co.

In obedience to the order contained in the Proceedings of the Government of Mysore No: 597-600 F.C.F. 6.95 I have examined the peelers and discs made by Messrs Rickie and co to the Specification of Mr. Syed Ameer Ali Mr. Rickie of Messrs Rickie and co and Mr. Syed Ameer Ali were present at the time the examination toots place. Mr. Syed Ameer Ali had brought a small quantity of cherry coffee, but it was not sufficient to make a satisfactory trial. If a bag of un-peeled coffee had been available the examination would have been more satisfactory. The machine is a very simple one consisting mainly of a frame which contains a vertical Spindle on which are mounted a pair of circular cast iron Serrated discs

The interval between the discs is adjustable by means of a hand wheel capable of being locked in any position by

mea

means of a pin. Motion is imparted to the lower disc by means of the vertical spindle through a pair of bevil wheels on the top. The machine also carries a horizontal axle with a pair of fly wheels one at each end for imparting the rotary motion to the vertical spindle by means of the bevil gearing. For the purpose of this report, I shall take up the parts one by one and consider them in detail as to their materials, workmanship and design. —

1. Frame. Workmanship and materials are not bad, but owing to the design it is not as rigid as it should be. Mr. Lloyd Archer tells me that, when the machines are set up, considerable difficulty is met with in making them run true. He also complains that the nuts used are not to the standard gauge. The latter error can be rectified by the firm by taking up the faulty nuts wherever they have used them

them. As for the former the makers are not responsible. However it is not a serious defect, and the machine will run all right if set up on a level ground —

2. — Fly wheel, horizontal spindle and bearings. The fly wheels are heavy and substantial but the handles are very rough and not fixed properly. The thickness at the point where they are fixed to the wheels are not sufficient. —

Horizontal axle. — The step for the bearing might have been made deeper. The brass bearings have been simply bored and put on. The makers ought to have filed and fitted them properly. No doubt after a few days working this defect will disappear. It will not cost much to ease the bearings and give them a good fit. The makers can do this even now. —

3. Bevil gearing. — On the machine — which was put up for trial I had nothing

to find fault with. But in some the keys have not been fitted and the wheels not in position. Messrs Rickie and Co. say that they were all fitted once and that subsequently the keys have been lost. It is quite probable as I find the key ways have been cut.—

4. Vertical Spindle. I find that this has been carried out according to the tracing shown to me by the Inventor. There is one defect in the top bearing which will soon interfere with the proper action of the machine. There is no means of adjusting it when it becomes slack owing to working. This is not a defect in the workmanship but of the design. The locking nut and hand wheel are all right.—

5. The discs. I was shown two forms of discs, one made wholly of ordinary cast iron and the other of cast iron bottom with chilled plates on the top. It is on the design of these discs that the patent is based and the success or failure of the machine depends upon

upon these. The first dies (i.e) wholly of cast iron has been made according to the designs furnished by the patentee. It seems that this got worn out soon and therefore the patentee proposed to have chilled plates screwed on the top. So far as these plates could be handled without going to considerable expense in the way of grinding them, I think Messrs Rickie & Co have done their best. But I cannot understand how they advised the patentee and much less undertook to make them. No doubt they did not anticipate the difficulties considering the force the workmanship is satisfactory. In one point they have failed to carry out the design of the patentee (i.e) in that they have omitted the "feeding channel" altogether. Messrs Rickie & Co say that they could not be made of chilled iron and so omitted it. But

P.T.O.

I don't think they are right there. no doubt it could be made but probably they found it cum them into some expense. —
The patentee asserts that this omission is the sole cause why so many berries escape unpecked. There is some truth in this but I am not quite sure whether the action would be perfect even if the channel had been made. The patentee asserts that the grooves are not sharp and deep. I don't think that they can be got better in cast iron. of course if they had been shaped in a machine they would have been better. But chilled iron will not admit of this and therefore the patentee has nothing to complain of. The patentee's next contention is that the surface is not true. With chilled plates and so many in number it is not possible to make the surface quite true. As I have remarked before the makers could not have done this —

this without going into considerable expenses. chilled cast - iron cannot be filed or chipped and therefore no fitting can be done. —

Besides in my opinion it is not necessary that the discs should run so true. I examined some of the machines and they were true enough. Coffee cups are of various sizes and if the interval between the discs be adjusted to some size it is bound to break up all others which are above this size and this will happen even if the discs run true.

In conclusion I am of opinion that. -

1. The materials are good.

2. The workmanship is fair with the exception of the points already mentioned in my report above.-

3. - Messrs Ricket and co have not made the discs exactly as per design viz omitting the feeding channels. -

4. - The discs have been fitted fairly well. There is room for improvement, but to do so the parts will have to be ground which will be very expensive indeed. —

5 The

5. - The design is defective No doubt it will feed the seeds but there will always be some crushed and some not feeded at all owing to the space between the discs not being capable of automatic adjustment. In fact if the upper disc had been mounted quite loose and weighted or pressed by means of a spiral spring, the machine would work better. One need not go far to see an example of this. The ordinary grinding Stones in every house-hold are very good examples. The machine now under reference are nothing more than these simple contrivances modified and improved. -

I am therefore of opinion that the fault lies not in the workmanship but in the design -

The Government of Mysore

The humble petition of Syed Amir Alee Sahib, inhabitant of Hassan in the province of Mysore most humbly and respectfully Sheweth

That the petitioner is the inventor of a machine called "Hussainee Coffee Peeler" and its later improvements

2. That the invention is expected to be of great utility to the Coffee-planters

3. That the petitioner obtained an Exclusive Privilege in British India for his Coffee Peeler and its improvement on the Eleventh day of April 1893, but which was actually sealed on the thirtieth day of March 1893.

4. That immediately after this the petitioner presented an application to the Government of Mysore for the protection of his patent.

5. That as the Mysore Inventions

and Designs Regulation of 1894 was not in force then, the petitioner presents another application for leave to file Specification under the said Regulation, on the twenty-fifth day of March 1895

6. That as the said Regulation itself was introduced into the province more than a year after the petitioner obtained the exclusive privilege in British India, and as there is no provision in the said Regulation for granting exclusive privilege for invention made, or Exclusive Privilege obtained in British India, before it came into force the petitioner entertains some doubt as to the entertainment of his petition under the said Regulation.

7. That the petitioner most humbly and respectfully begs to point out that the Regulation as it is needs some provision for recognising the Claims of Subjects who have acquired an Exclusive Privilege in British India, or who have made inventions more than one year before the passing of the Regulation; and it is very hard upon such people and especially upon Subjects of this State like the petitioner, whose application for an Exclusive Privilege was

presented

presented immediately after the acqui
sion of such privilege in British dis
and who rely upon this Government
Support

The petitioner, therefore, most
respectfully prays that the Governme
will be pleased to consider the cases
most humbly suggested by the petition
and be graciously pleased to make
necessary amendment in the Regula
tion for ensuring the privileges of
Subjects of the Imperial Governmen
whose Case falls under the Circum
stances mentioned above

And the petitioner shall
duty bound ever pray

Syed Ameer Ali

With reference to Government Pro: Nos 3955-6 G F 79-92 and 597-600 H F 2-95 dated 11th September 1892 and 16th July 1895 respectively, sanctioning a loan of Rs 7845-- to Mr. Syed Ameer Ali with a view to help him in the manufacture and sale of his patent "Husaini Coffee peelers" and stating that Mr. Syed Ameer Ali would be allowed to sell these machines at prices to be fixed by him and to repay the cost of manufacture paid by Government as each machine is sold, I have the honor to state that out of the 54 machines manufactured, 18 are said to have been handed over by Messrs Rickie & Co. to the patentee and the remaining 36 to the C. P. W for temporary safe custody (Vide Govt: Order dt. 597-600 & H F 2-95 16th July 1895); and that out of the total amount paid by Government on this account, Viz: Rs 7895-6-- including the carriage for

for the removal of the machines from the Company's workshop to the Ex: Engineer's office Bangalore Division, only Rs 2000-0-0 were refunded during January and February 1893, leaving a balance of Rs 5895-6-0 still unadjusted. Since then none of the machines appear to have been sold and no recovery made in consequence towards repayment of the loan.

I have therefore the honor to request that you will be so good as to lay the matter before Government for such orders as they may deem necessary to enable me to adjust the outstandings

that it was only on account of the bad
manufacture that I could not sell
the Peelers, and pay the cost to Govern-
ment as agreed. Unless the machines
be repaired at a heavy cost they cannot
be sold. To prove that they are badly
made, and there is good demand for
well finished Peelers according to my

they arrive, I will get a report on the

Respected Sir,

In reply to your Docket No. 1011/mis. in which a copy of the letter of the Secretary to the Government of Mysore General No. 5595/N.S.2-95 dated the 21st December 1895 is enclosed, I humbly beg to submit the following facts for kind consideration of the Government.

That the Hussainee Coffee Peeler having been declared by the Planters to be an useful invention, the Government was graciously pleased to get Some Peelers made by Messrs Pickies &Co. and to allow me to sell them for profit and to return only the cost of manufacture to the Government. By this they were pleased to do to encourage Local Invention and Industry. But these machines having been badly made in casting, turning, and fitting, they always get into disorder in one part or other. Under the agreement

... sent by mail
to make new coffee Peelers for the Government
instead of those that are badly made.

I have been informed that

the Chill Iron discs of both the Coffee, and
Chill Iron facings were necessary to
make them durable, and Messrs Rickie &c
though they did not know how to make these
(as was subsequently proved) wrongly —
undertook to fit the machines with Chill
discs and entered into a second agreement
to that effect, and having made some
useless things contrary to my design, made
the machines worse, and drew the full
amount from the Government, which they
were not entitled to.

Therefore though there is a
great demand from Planters for the ma-
chines, it is not possible to sell them without
repairing them thoroughly and putting them
into proper working order.

These facts having been
brought by me to the notice of the Government
Messrs Rickie &c said that the invention
was bad. Therefore to prove that the inven-
tion was good, but that owing to the defect in
the manufacture they did not prove a
success. I made arrangements to get a
new Peeler made here and also to get
one repaired. But as regards the Chill
Iron discs after trying Madras, Bombay and

entered by Messrs Rickie & Co, they are bound to make new coffee Peeler for the Government instead of those that are badly made.

It having been found out that the Cast Iron discs get worn out soon, and Chill Iron facings were necessary to make them durable, and Messrs Rickie & Co thought they did not know how to make these (as was subsequently proved) wrongly undertook to fit the machines with Chill discs and entered into a second agreement to that effect, and having made some useless things contrary to my design, made the machines worse, and drew the full amount from the Government, which they were not entitled to.

Therefore though there is a great demand from Planters for the machines, it is not possible to sell them without repairing them thoroughly and putting them into proper working order.

These facts having been brought by me to the notice of the Government Messrs Rickie & Co said that the invention was bad. Therefore to prove that the invention was good, but that owing to the defect in the manufacture they did not prove a success. I made arrangements to get a new Peeler made here and also to get one repaired. But as regards the Chill Iron discs after trying Madras, Bombay and

Calcutta, I came to understand that they could not be made in India and in trying some Firms in Europe, I learn that well known ones do not undertake to execute small orders as one or two sets of discs; and I have no funds of my own to give orders on any large scale. After a long search I found a Firm which is willing to oblige me by executing my small order. I am therefore waiting to get the discs from Europe to fit them to the machine and to take them to European Planters who having approved of the invention promise to give a report on the usefulness of the machines and also give orders for a large number of the same if they are satisfied with the kind of manufacture.

Under these circumstances I pray that the Government will graciously be pleased to allow me so much time as is necessary to obtain a conclusive report on the machines with their orders for the same.

The Government is aware that the advance in question obtained and spent entirely for the machines which are with the Government as security for the loan.

I humbly beg to add, I have every hope that my machines will prove a successful Local enterprise which the Government has always been so desirous

of encouraging.

I beg to Remain,

Respected Sir,

Your most obedient Servant

Genl & Rev. Deptt

SIR,

I have the honor to invite your attention to my letter No. 5314 / S.A. 1444 of 31st January last regarding the balance of amount due by Mr Syed Amir Ali towards the loan granted to him for "Hussaini Coffee Peelers", and to request the favour of being informed if any orders have been passed on the Hassan District Dy Commissioner's reference on the subject.

Mr Syed Amir Ali was written to through the Dy Commissioner Hassan Distt to acknowledge the correctness of the balance due by him on 30th June last as required by article 1425 of the Civil account Code Vol: II and his reply, stating that he is unable to acknowledge its correctness on the score that the advances were drawn in several instalments by Messrs Rickie & Co, as the manufacturers of the Coffee Peelers, is enclosed for information and for such action as Govt may deem fit to take.

I have the honor to be

Sir

Respected Sir,

In reply to your docket no. 1421 dated 4th instant, in which the copy of the Accountant's letter dated 25th ultimo is enclosed, I respectfully beg to inform you that the sum that I paid to the Huzur Treasury is Rupees 2,000/- only; but the advance paid by the Government, having been drawn in several instalments by Messrs. Richie, as the manufacturer of the Hassanee Coffee Reeler, I am unable to check that account or to acknowledge the same to be correct.

Dated 10th March 1892. Bangalore. I am etc.

Sir,

With reference to Government Proceedings No 3724-6 / 7L 7-2-95 dated 5th November 1900 and subsequent reminders requesting to report how many Coffee peelers and winnowers of Mr. Sayed Amir Ali there are now in hand and what lands or properties he has in this District &c, I have the honor to enclose herewith a statement giving particulars as to the number &c of the Coffee Peelers and winnowers

wiminers as also of the properties belonging to Mr. Syed Amir Ali in this District.

2. — Except the landed properties in the Manjarabad Taluk Specified in the enclosed statement for the purchase of which a sum of Rs 9573-6-4 has been advanced to Mr. Syed Aircer Ali supplemented by a further loan of Rs 5000/- sanctioned in Government Proceedings No. 1028-29 Rd. 76-94 dated 4th February 1897 on the security of his mother's house at Hassan for their improvement, he is reported to possess no other property. It may be mentioned that the aforesaid lands in the Manjarabad Taluk belonging to Mr. Syed Amir Ali are reported to have been valued by the Panchayetdars at Rs 7 100/-

(vide

(Vide Para 3 of the Sub Divisional officers docket no 346 dated 8/9th February 1907 submitted with this office no 483 dated 15th ultimo).

With regard to the machines now in hand, it has been reported that people are not likely to go in for them and this is stated by Mr. Amir Ali himself who says that messrs Richie and Co have badly manufactured them.

3. — It may thus be observed that Mr. Syed Amir Ali does not seem to possess sufficient assets which can be proceeded against for the recovery of the present advance, the only properties of his in the Manjanabad Taluk being already under liability for the loan advanced to him under the Land Improvement Loans Regulation. In these circumstances, I beg to submit that I do not

not see my way to suggest any proper means for the recovery except that a notice might be given him fixing a period say, 3 months within which he might be required to pay up the amount and in default to have the machines belonging to him attached and sold by public auction and the proceeds credited to his account. The balance may be tacked to his other loan referred to and recovered gradually at certain fixed instalments or dealt with in such other manner as the Government may be pleased to think fit under the peculiar circumstances of his case.

Honored Sir

With reference to the Government Proceedings No. 2044-8 / F L 72 of 93 dated Bangalore 11th May, 1901 Copies of which are forwarded to me by the Deputy Commissioners of Bangalore and Kadur Districts the former asking my opinion and the latter my consent to sell the Coffee Peelers invented by me I beg to submit that I have often represented to the Government that the manufacture of the Peelers in question being very hard they do not work and that therefore they cannot be sold. In proof of my statement I beg that I will place a machine before the Government properly manufactured based on the same principles of invention by the ensuing Coffee Season for trial which shall then prove

proves that the failure was due to
the bad manufacture only

I further beg to state that
if the machines be thoroly repaired
by the speaker they would effect the
desired sale otherwise they would
be sold to the value of scrap iron
in the present condition

In conclusion I pray that
the government will be kindly
pleased to favour me with a chance
to prove that there is no defect
in my invention but in the
manufacture only

For which act of kindness
and benevolence I shall ever pray
for the prosperity of the government

Honored Sir,

With reference to Govt Proceedings
No 9044-8 dated Bangalore 11th May 1901,
F.I. 2795
copies of which are forwarded to me by the
deputy Commr of Bangalore and Kadur
Districts, the former asking my opinion
and the latter my consent to sell the coffee
peelers invented by me, I beg to submit
that I have often represented to the Govt
that the manufacture of the peelers in
question being very bad they do not work
and that therefore they cannot be sold.
In proof of my statement I beg that
I will place a machine before the
Govt properly manufactured based
on the same principles of invention
by the ensuing coffee season for trial
which shall then prove that the failure
was due to the bad manufacture only.

I further beg to state that if the
machines be thoroughly repaired by
the maker they would effect the desired

sale; otherwise they would be sold to the value of scrap iron in the present condition.

In conclusion, I pray that the Govt will be kindly pleased to favor me with a chance to prove that there is no defect in my invention but in the manufacture only.

For which act of kindness and benevolence, I shall ever pray for the prosperity of the Government.

I beg to remain &c

(Through the Chief Engr of Mysore)

Sir,

I have the honor to acknowledge the receipt of your No. 1628/F.L.2-95 and enclosures dated 22nd instant.

I inspected the practical working of one of the "Hasain Coffee Peelers" this morning in the presence of Mr.Meer Alli and Captain Traill R.E.,

The inventor fully explained all the points in his inven-tion, and gave me his opinion as to the cause of the unsatis-factory results obtained, which he puts down to the bad work-manship and unsuitable materials employed by Mrs. Rickie & Co. in the construction of the Coffee Peelers.

After careful consideration I gave it as my opinion that the Machine as designed, will never prove satisfactory or come into general use, irrespective of workmanship or materials put into it as I do not consider that it provides for meeting all the requirements of a Coffee Peeler. The Machine is crude & in its present form cannot prove a success.

Regarding Mr. Rickie's share in the question, I consider that the work and materials are as good as could be expected from a small local shop, which could not pretend to turn out a well finished machine, such as could be built in Europe.

I strongly advise Government not to expend another Rupee on the development of the invention under the existing circumstances.

I have the honor to be,

Honored Sir

A Notice dated the 1st June 1902
has been served on me from the Deputy
Commissioner of Bangalore demanding
the payment of Rupees 58.95 said to
be due by me on account of the Husains
Coffee Peelers I therefore beg to bring
the following facts to your Hon'ble
notice for submission of the kind
Government

It having come to the notice of
the Government that the Husaines
Coffee Peeler is a good invention the
Government by the good intention of
encouraging the local industry was
graciously pleased to get 54 Husains
Coffee Peelers made for the Government
by Messrs Rickie & Co a local firm
newly started in Bangalore and
advanced the money for the manu-
facture of them and ordered me to
sell them for any price I thought
proper

proper and take the balance of the sale money to myself after paying the actual cost to the Government vide Proceedings No. 395-5-6 G. H. 79-92 Dated Bangalore 11th September 1892 The condition in the bond executed by Messrs Rickie & co were that the machine must be true and strong and the workmanship must be good otherwise they were to be broken up and new ones made instead unfortunately the Peelers were not made good as agreed in this bond on contrary have no grooves to the faces of the discs and no peeling channel is made which are the parts of the designs of the invention. Captain A Joly de Lotbiniere was convinced on this point

For the question whether the invention is useful or not I humbly and respectfully beg to submit that the Coffee Planters who are in want of such machine are the proper persons to answer When I spoke to them personally they approved of the invention but condemned the manufacture. I had several letters from Planters advising me to get this machine made nice and true that they would buy them but they are destroyed by white ants

ants when the house where my papers were left was deserted for a long time by the owner during the plague but I found only two letters which are herein enclosed. I have also ordered Chill Iron fasings for the disks from Budapest to make a true machine and to submit for trial during this season but the gentleman through whom it was ordered having gon to Germancy on medical advise I could not get them up to this time.

Refering to above circumstances I respectfully beg to invite the kind attention of the Government to the fact that the machines not having been manufactured in accordance with the terms of agreement and design they could not be sold otherwise they all would have been purchased like the few that were sold to the planters before the discovery of the difect in manufacture. The Government will therefore graciously excuse me a faithful subject of the Government for not having been able to sell the bad articles made by Messrs Rickie & Co and not to hold me responsible for their fault. The Planters after trying the Peeler made by

by

by Messrs Rickie + Co (as expressed in the enclosed letter) and felt with the manufacture only they dont propose any development in the invention.

This being the coffee planting season I beg to bring to your Honors kind notice I intend to go to the coffee estate and return to Bangalore after the monsoon is over by which time I shall get the chill Iron facings that I have ordered from Budapest.

the machine should have been perfect for anything wrong in the Planters we be sure to think that if it was in any way faulty others would be worse. I am quite sure that the only way to make it a success is at once to set to work and have the machine thoroughly overhauled and thoroughly examined and ready for next season so that there may be no hurry in getting them ready and no chance of failure as there has been the last two seasons for if there is the machine is damned per se — Mr Mc D— wrote he had a lot of Planters but with

Benguela 1st Feb.y/94

Dear Sir

Although I have not yet heard from Mr Mc Donald direct, he has written to his sister to say that the trial has been a failure, as I expected the plates would not fit properly & the Fitter said he had not the tools with him to put them right - This shows how necessary it is to have good work and I told you I did not think that the Peeler I saw at Mr Macaulay's would do - and for a trial

all agreed in condemning in the present state but all the mechanics were pleased with the principle & I said if it was only properly carried out we would have an engine sale. You see therefore that it is only proper & such work that is required for you to make a lot of money and if you can't get such work here, you must go elsewhere

Dear Sir,

We believe 33 coffee peeling machines (obsolete) belonging to the Mysore Government are for sale at the Executive Engineer's office. As we can use these up as scrap in our foundry, we beg to offer Rupees four hundred and sixty two for the lot, if we are allowed to take them as we can use them up. We will take not less than eight at a time, and pay cash before removal and undertake to use them all up before the end of November 1902.

Sir,

With reference to Government
Proceedings No: Fl. (130) 1860-3 / Fl: 7. 2-95 Dated 24th
May 1902, I have the honor to
state that out of the three Combined
Automatic Coffee peelers with Winnow-
ers and 5 small and two large
peelers reported in this office No.
567 Dated 22d March 1901, I have
been

been on hand on the Protech one Combined Coffee peeler and Winnower shewn against the Alur Sub Taluk through oversight, has since been reported by the Deputy Amildar of Alur to be of a different make and to belong to Mr. Hunt of Hulkunda Estate.

2 —— The two Combined Coffee peelers and winnowers shewn against Manjarabad and Belur Taluks were ordered to be sold on the 5th and 7th respectively of November 1902 after due notice to Mr. Syed Ameenulli and after duly publishing the same in three successive issues of the Mysore Gazette. The Amildar of Manjarabad reports that the

one

one in his Talukhas sold in public auction for Rs 257 on the 7th and there were no bidders for it on the 5th (the prescribed date) and 6th of November 1902 to one Gunda Setty who alone bid for it and produced a deposit amount of Rs 6. 4. - but paid the remaining amount on the 29th November 1902 i.e. 7 days after the due date. The Amildar of Belur reports that none came forward to bid for the one in his Taluk on the prescribed date, viz the 7th November 1902, owing to the absence of Plague in Belur and requests that a reasonable date for selling the same may be fixed and the same notified in the Gazette. A fresh date will

will be fixed for selling the same
as early as possible.

3 — The remaining seven machines
that were in possession of D.W. Syed
Amin Ali were ordered to be taken
possession of by the Hassan Taluk
Amildar who reports that D.W.
Syed Amin Ali has handed over
seven machines piece meal
stating them to form 5 in number
and that the remaining 2 pickers
were sent to the Cotton Spin-
-ning and Manufacturing
Company at Bangalore. He also
adds that a wheel of one of the
machines sent to Bangalore
is included in the machines
handed over to the Hassan Taluk.

4 — Under these circumstances,
I solicit orders as to whether the
machines

Macluan handed over piece.
Neal may be sold as they are
or to get a fiddle from Baccalaoe
to fit up the Macluan keepsake sale.
Further beg that the two Macluans

Rev: and Genl Depts.

Sir,

In continuation of this Office letter No. 686 of the 31st January last, regarding the sale of the Coffee Lands of M/s Syed Amir Ali, I have the honor to state that the sale of 34 Coffee Lands was advertized in the Mysore Gazette. In the sale katti it is stated that those actually in the Compound of the Executive Engineer's Office

Office were put to sale on the Day fixed. In the same list it is recorded that the bid of Abdul Rahiman (2nd bidder) was 300 for 34 coffee heirs. The highest bidder in whose name the machines were knocked down at the sale was Hyder Khan. The bid was for Rs 340/- This was communicated to Government in this Office letter No. 325 dated 29th September 1902, and the sale was confirmed in pursuance of Government Proceedings No. 890-1 / H 2-95 of the 3rd December 1902.

2. The Executive Engineer was accordingly asked to put the purchaser in possession of the heirs. In reply he

he Stated that 33 coffee heels together with their subsidaries were handed over to the purchaser (Vide his docket No. 133/65 dated 4th January 1967) and that one heels had been previously transferred to the Belagola Water works by the Executive Engineer, Hessaraghatta Water Supply Division long before the receipt of final orders of Government in the matter and requested to be intimated of the average rate per heels with reference to the amount realized at the auction sale.

(3) As in the karaz patti, it was clearly stated that the machine in the sale premises were to be sold

The

purchaser can have no claim on the one removed from the premises long before the sale. I therefore solicit the orders of Government to credit the cost of the one herein in question to the balance due by the Syed Amir Ali. There would have been no necessity for this reference, if the Officer conducting the sale had counted the number of machines and mentioned the number in the sale list. I may add, that up to now the purchaser has not demanded the 34th heder and seems therefore to have acquiesced in getting possession of the machines as per sale list.

With reference to your letter No. 1455 of the 22nd ultimo submitting a petition from Hyder Khan who purchased the Coffee Seeds sold in Bangalore, it is observed that the Dy. Comr. in his letter No. 1015 of 18th March last, forwarded by the Executive Engineer, Bangalore Division, have been transferred to the Bangalore Water Works proceeds which he credited the balance due by the said Hyder Khan upon the grounds that as it was very much feared that the seedlings in the earthen pots were also sold the purchaser could not have any claim on the seedlings removed from the pots before the sale, and that the Petitioner must have acquiesced in the

prospect of the number mentioned in the Sale list ~~Since he had got the Note~~ without prejudice to his claim lodged for the prospect of the remaining one in question.

From the contents of the Instruments forced to by the petitioner, it is apparent that the petitioner has not waived his right to the Feeder in question, that as he was carrying on correspondence with the Supt. Lower, who holds the Sale, and the Exc. Engineer for the delivery and that he approached the Supt. Lower with his claim only after he was told to do so by the Supt. Lower.

~~Even if the documents the petitioner forced to sign~~ ~~Supt. had he title over payment~~ ~~for the Value of the Feeder in question~~ ~~as stated in his letter no. 2107 dated 21st March~~ ~~received~~ ~~the Exc. Engineer.~~

If as alleged the remaining Feeder was also promised to the petitioner by the Asst. Comr. its value might be paid to Petr. Otherwise, it may be credited to Govt as proposed by the DC Comr.

Bangalore

Sir,

With reference to your docket No. H. 1595 dated 6th February 1903, I have the honor to report that the sale of the Hussini coffee peeler in the Ranjarabad Taluk is confirmed and that the peeler in the Belur Taluk was ordered to be sold on the 25th May 1903.

2—. I have personally seen the five machines

machines handed over piecemeal by Mr. Syed Amir Ali to the Amildar of Hassan and have ordered them to be sold as they are as I do not find it profitable to fit them up before sale. The result of the sale will be duly reported.

Result

3—. As regards the 2 machines at Bangalore, I beg to enclose a Statement obtained from Mr. Syed Amir Ali stating that he gave the two machines referred to, to the possession of one Mr. C. P. Mule, Manager of the Cotton Spinning and manufacturing Company at Bangalore on condition of repairing them, so as to make them work properly. Meanwhile, the business of the Company having ceased, the said Mr. Mule left for England on leave and the machines are said to be
